Summary

With over two years of experience in front-end development, I have participated in multiple medical and internal company projects, specializing in React. Strong communication and collaboration skills, enabling efficient teamwork with cross-functional teams to optimize product experiences.

Passionate about learning and continuously improving development skills. I aspire to leverage my front-end expertise to create innovative and impactful products that deliver outstanding user experiences.

Work Experience

Front-end developer - Wistron Corporation, Kaohsiung, Taiwan *Oct. 2021 — Jul. 2024*

- Developed the front end using React and UI Library(Ant Design) to enhance development efficiency and ensure UI consistency.
- Maintained and developed new features for the digital pathology project, optimizing the system to improve usage rates among doctors.
- Developed the interface for onstage animation control and event management, offering users an easy-to-use data import and management interface, successfully supporting multiple events.
- Improved the chatbot UI and knowledge management features on our internal GenAI platform, enhancing system stability and accuracy based on user feedback.

Front of House Staff - Reve Cafe, Tainan, Taiwan *Sep. 2020 — Jan. 2021*

- Explored various career paths through a service staff role while simultaneously learning web development, which sparked a passion for coding and motivated me to pursue a front-end engineering career.

Education

Bachelor of Business Administration in Information Management *Sept. 2016 — Feb. 2020*

Tamkang University, New Taipei, Taiwan

Skills and Languages

Web Development: HTML, CSS, Tailwind CSS, JavaScript (ES6+), TypeScript, React
